## DETAILED ACTION

### *Allowable Subject Matter*

Claims 1-19 and 22-52 are allowed.

The following is an examiner's statement of reasons for allowance:

Applicant's arguments filed January 7, 2005 have been found convincing. Accordingly, the rejections of the previous Office Action have been withdrawn. Specifically, the prior fails to teach, or make obvious, the limitations of the composite material being a mixture of a matrix and transfer material, laser desorbing the composite material through a transparent substrate, and depositing the composite material as a mixture of matrix and transfer material. Neither Joyce nor Bills teaches that the composite is deposited as a mixture. The composite of Joyce is not a mixture. Although the composite of Bills is a mixture, the matrix material is completely evaporated during laser transfer. Thus, the deposited material is not a composite mixture comprising a matrix and transfer material. A combination of these references fails in obviating the limitations discussed above. An updated search confirmed that the prior art fails to teach, or make obvious, the limitations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
